SUMMARY

Backend Developer with strong full-stack capability, specializing in Python (FastAPI), Node.js, and NestJS for building scalable REST APIs and modular backend systems. Experienced in designing service-controller architectures, implementing JWT authentication and role-based access control, and working across PostgreSQL and MongoDB. Comfortable extending into frontend development with React.js and Tailwind CSS to deliver complete features end-to-end.

WORK EXPERIENCE

Backend Intern -- Python (FastAPI)

Nov 2025 -- Feb 2026

- Contributed to CRM and messaging integration features for a SaaS chatbot platform serving multiple client accounts.
- Independently built and tested webhook-based integrations for LINE and Telegram messaging platforms, handling incoming and outgoing message payloads.
- Collaborated with frontend developers to align chatbot workflow APIs with UI requirements, reducing integration back-and-forth.
- Structured backend services using factory patterns to decouple platform-specific logic, improving maintainability as new messaging integrations were added.
- Transformed raw third-party payloads into normalized internal schemas to standardize downstream processing.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)

- 2022 -- 2025

Higher Secondary Education (+2 Science)

- 2021

PROJECTS

BLOG APPLICATION

- Developed RESTful APIs for authentication, posts, comments, and user management using Express.js and MongoDB.
- Implemented secure CRUD operations with middleware-based authentication and authorization on protected routes.
- Built a responsive React.js frontend with Tailwind CSS using a reusable component structure.
- Improved perceived performance through efficient client-side state management and modular component design.

SKILLS

- Languages & Frameworks: Python (FastAPI), JavaScript (ES6+), Node.js, Express.js, NestJS, tanstack query
- Databases: PostgreSQL, Redis
- Tools & Platforms: Git, Linux, Postman, VS Code, ORM
- Concepts: REST APIs, JWT Authentication, RBAC, Backend Architecture, API Integration.
